

## Spring Trade Fairs with Brooks Automation

Brooks RFID Division will present its RFID solutions at a number of different trade fairs.

Mistelgau, 6<sup>th</sup> February 2007 – The supplier of contact less identification systems is facing a lively spring packed with various events. The company will be exhibiting its products and presenting its RFID related services at four trade fairs in March and April.

The exhibition season starts with CeBIT in Hannover, where the company is represented with its own booth in Hall 6 H48. Brooks can be found immediately next to the Solutions Park Auto ID/RFID where it will be showing its innovative solutions for textile retail and internal logistics.

The following week, Brooks is presenting its range of services at the leading American RFID exhibition RFID World USA. The various readers will be presented in the Gaylord Texan Resort in Dallas on booth 1617.

The next stop is again in Germany, where Brooks can be found at the Hannover HMI in the Industrial Identification Pavilion (Hall 16 Stand E42). The special show will illustrate the benefits of modern identification technologies to visitors, with Brooks' RFID programme being fully in line with current trends.

The spring fairs will conclude with RFID World Asia in Singapore. As it has been for the last two years, Brooks RFID Division is again represented with its own booth in the Suntec City Center. The focus of the exhibition programme will be on RFID reader options from the HF product line (13,56 MHz).

Brooks Automation looks forward to receiving visitors and hopes for a large number of interesting conversations and discussions on the subject of identification!

An overview of the trade fairs:

- CeBIT Hannover – 15<sup>th</sup> – 21<sup>st</sup> March - Hall 6 H48
